## PROJECTS

### Keylogger — Cyber security

- **Technology:** Python
- A keylogger is a type of software that records the keystrokes typed on a computer keyboard. It is often used to monitor and record the online activities of a person or group without their knowledge.
- 

### BuilderX – web development

- **Technology:** HTML, CSS, JS.
- The portal is all about a digital platform that is specifically designed for companies in the construction industry. It can be used to showcase the company's projects, services, and capabilities, as well as provide information about the company's history and values.

**GitHub:** [Ankit](#)

## Skills

### Programming Language

Python, Java

### Scripting Language

Bash, html, CSS

### Database

MySQL, Oracle,

### Tools

Pandas, NumPy, Matplotlib,

## Coursework

- Data Structures and Algorithms
- C, C++, Java, Python, Web
- Object Oriented Programming
- Operating System
- Database Management System
