 Ankit Singh

EDUCATION

▷ **Lovely Proffesional University**

B.Tech in Computer Science and Engineering

2020 – 2024

CGPA: 7.45

WORK EXPERIENCE

1. **Software Engineer**

(Apr 2025 - Present)

• [Hornet Decentrtech Pvt Ltd.]

▷ Interpreted large-scale blockchain datasets from core node and indexer teams to derive insights on wallet activity patterns, transaction trails, counterparty links, and risk indicators.

▷ Engineered a graph-search (BFS) workflow to automatically determine the closest known entity, exchange, or mixer for any wallet — dramatically reducing manual investigative time.

▷ Modernized attribution storage by migrating the known-address PostgreSQL dataset to Neo4j and introducing caching layers across services, drastically improving query speed and consistency.

▷ Created benchmark and stress-testing scripts to evaluate maximum concurrent load and performance of blockchain forensic APIs.

▷ Conducted P2P-level Bitcoin network analysis to correlate transaction origin IPs with geographic information and improve attribution confidence.

▷ Performed fund-flow tracing for major exchange exploits (CoinDCX, WazirX, Bybit, Nobitex) and provided analytical support during law-enforcement investigations.

▷ Designed standardized forensic report templates tailored for law-enforcement submissions, improving the turnaround time for fund-freeze and refund requests.

▷ Delivered training sessions and course material for law-enforcement personnel on blockchain fundamentals, tracing methods, and anti-crypto-fraud workflows.
2. **Software Developer**

(Apr 2024 - Apr 2025)

• [Blocktech brew]

▷ Led deployment and maintenance of full blockchain nodes and designed ultra-low-latency ETL / indexer pipelines purpose-built for forensic address tracking across major UTXO and account-based networks including Bitcoin, Ethereum, Tron, BSC, and more. Utilized PostgreSQL, Neo4j, and Redis to power real-time ingestion and large-scale analytics.

▷ Built and performance-tuned on-chain analytics APIs spanning **35+ blockchains**, enabling seamless multi-chain intelligence for internal and external stakeholders.

▷ Automated enrichment of known-entity datasets and integrated OSINT data feeds, significantly increasing cross-chain attribution accuracy while eliminating manual processing bottlenecks.

▷ Analyzed threat-intelligence datasets to classify wallets linked to scam, phishing, exploits, laundering, and mixer activity — strengthening the platform’s risk and compliance capabilities.

▷ Designed heuristics and tooling to reliably differentiate exchange deposit addresses from exchange hot wallets, reducing false positives during forensic investigations.

TECHNICAL AND SOFT SKILLS

- **Languages / Databases:** PostgreSQL, MongoDB, Redis, Neo4j (Cypher), SQL for data querying, Bash for automation

- **Blockchain Forensics Skills:** On-chain transaction analysis, wallet clustering, scam/phishing attribution, mixer/coinjoin detection, cross-chain tracing, address/entity risk scoring, counterparty flow analysis, OSINT-based wallet profiling

- **Blockchain Tools Intelligence Platforms:** Arkham, Breadcrumbs, Crystal Blockchain, Chainalysis-style investigation workflows, UTXO/account-based chain explorers, Uptime Kuma for service monitoring

- **Cloud / API Data Pipelines:** Working with REST blockchain APIs and WebSockets data feeds, caching/query optimization for large dataset analytics, blockchain dataset indexing collaboration

- **Systems / DevOps Exposure:** Ubuntu/Linux, automation scripts, cron-based scheduled analytics tasks, backup data retention support processes

EXTRACURRICULAR ACTIVITIES

- Participated in the **Crypto CrimeCon Online Hackathon 2024** (unofficial public event) where the focus was on tracking suspicious wallet movements across multiple blockchains.

• Member of several Web3 and cybersecurity communities on Discord and Telegram, frequently engaging in discussions on blockchain forensics, exploits, and regulatory developments.

• Regular contributor to open-source documentation and knowledge-sharing blogs related to blockchain UX and data visualization.

• Volunteered as part of a local NGO’s **digital literacy campaign**, helping students learn safe internet practices and awareness around online scams, phishing and online frauds.

• Personal passions include **travel photography**, **fitness running**, and **playing football**.
